Cast Iron Electric Stoves

There is nothing more relaxing or comforting than the warm, welcoming glow of a fire. Without the need for flues or fire places this can easily be achieved.

We at Broseley Fires should know, we are a family run company with more than thirty-five years experience in designing, developing and manufacturing home heating appliances. Our design team has a passion for creating stoves which combine tradition and elegance with realism and efficiency.

Broseley Fires have become a household name in the stove industry, originally proving our expertise by developing appliances for other manufacturers. More recently we have used this renowned experience to launch our own ranges of Multifuel (wood and coal), Gas and Electric Stoves.

Lincoln
Electric Stove

Stove shown with
standard black finish and
coal effect

Lincoln Electric Stove

FUEL TYPE	HEAT OUTPUT	WEIGHT	COLOUR	ENAMEL COLOUR RANGE
ELECTRIC	2 Kw	55 Kg	 COMES AS STANDARD	   BY SPECIAL REQUEST

DIMENSIONS

FEATURES LINCOLN

- Supplied with logs and coals for your choice of fire bed effect
- Double doors - can be run with doors open
- Thermostatic Control
- Slim-line model
- Concealed control panel
- Optional top flue spigot (to accept a dummy \varnothing 125mm flue pipe)
- No chimney or fireplace required
- Also available in gas

Canterbury

Electric Stove

Stove shown with
standard black finish, black
handles, arched window and
coal effect

Canterbury Electric Stove

FUEL TYPE	HEAT OUTPUT	WEIGHT	COLOUR	ENAMEL COLOUR RANGE
ELECTRIC	2 Kw	55 Kg	 COMES AS STANDARD	   BY SPECIAL REQUEST

DIMENSIONS

FEATURES CANTERBURY

- Supplied with logs and coals for your choice of fire bed effect
- Optional door designs (not available on enamel versions)
- Selection of door furniture
- Thermostatic Control
- Slim-line model
- Concealed control panel behind ash door
- Optional top flue spigot (to accept a dummy \varnothing 125mm flue pipe)
- No chimney or fireplace required
- Also available in gas, multifuel (coal or woodburning)

Shown with Black Handles
and Lattice Door as standard

York Grande/Midi
Electric Stove

York Midi/Grande Electric Stove

FUEL TYPE	HEAT OUTPUT	WEIGHT	COLOUR
YORK MIDI ELECTRIC	2 Kw	47 Kg	 COMES AS STANDARD
YORK GRANDE ELECTRIC	2.8 Kw	57 Kg	

DIMENSIONS

YORK MIDI

A: 440mm
B: 580mm
C: 460mm
D: 310mm
E: 260mm
F: 245mm

YORK GRANDE

A: 610mm
B: 580mm
C: 620mm
D: 310mm
E: 260mm
F: 245mm

FEATURES YORK MIDI

- Optional door designs
- Selection of door furniture
- Slim-line model
- Concealed control panel behind ash door
- Optional top flue spigot (to accept a dummy \varnothing 125mm flue pipe)
- No chimney or fireplace required
- Coal effect only
- Thermostatic Control
- Also available in gas, multifuel (coal or woodburning)

FEATURES YORK GRANDE

- Optional door designs
- Selection of door furniture
- Slim-line model
- Concealed control panel behind ash door
- Optional top flue spigot (to accept a dummy \varnothing 125mm flue pipe)
- No chimney or fireplace required
- Choice of log or coal effect
- Thermostatic Control

"We are a family run company with more than thirty five years experience in designing, developing and manufacturing home heating appliances".

Modern Technology

In the modern world of the 21st century, individual craftsmanship is being eroded by the requirements for standardisation and measurements of quality and safety. We at Broseley Fires have been able to achieve all of these requirements by using traditional castings to construct complete heating appliances which are then tested and approved to the highest European standards.

We have invested heavily into establishing a research and development laboratory. Our engineers are able to test Gas, Multifuel and Electrical appliances using the latest analysers, calibrated fuels and instrumentation to ensure each and every product meets the requirements of European (C.E) Standardisation and approval.

Traditional Casting

Experience has taught us that our customers want to balance the aesthetics of their chosen appliance with practicality. We have endeavoured to create stoves which are not only designed to suit the style of your living room, but are built to stand the test of time. We believe in using long-established materials, such as cast iron, as the material to craft our stoves from.

Cast iron has been used for centuries for its excellent ability to convect and radiate heat. Only cast iron allows the creation of intricate pattern work that cannot be matched by any other material, therefore it remains a material unrivalled in stove manufacture.

Design Team

Our design team has proved itself to be unbeatable in the creation of electric flame effect stoves. We have been able to combine the best realistic flame effect with the quality of cast iron to produce a range of traditional appliances that are not just for heating but also quality pieces of furniture to complement your living room.

All our electric stoves are actual derivatives of our multifuel versions and have been built using the same quality grade of cast iron.
